Introduction

An online class is a course conducted over the Internet. They are generally conducted through a learning management system. Students can view their course syllabus and academic progress, as well as communicate with fellow students and their course instructor. Online classes are typically a mix of video recording or live lectures supplemented with reading and assessments that students can complete on their own time. At present COVID-19 impact on students so all institutions are taking online classes.

Objectives of the Study

Following are the important objectives of the present paper

1. To study the challenges faced by the teachers regarding online classes.
2. To suggest improvements for online classes.

Research Methodology

For the present paper, the following methodology is adopted. Primary sources were collected through online. An online e-survey based on a questionnaire focusing on current issues in how teachers managed to complete their syllabus online classes. The e-survey was conducted using 'Google Form' from 17th November to 17th December 2020 to collect the information. The totally sixteen questions dealing with various dimensions and the questionnaire link was sent to teachers through e-mail, Whatsapp groups and social media platforms. The study was based on the 100 respondents belonging to various institutions and
